# **ska-gui-local-storage Documentation**

***Release 1.0.1***

**SKAO**

**Mar 20, 2024**

**CONTENTS:**

<b>1</b>	<b>Overview</b>	<b>3</b>
1.1	Usage . . . . .	3
<b>2</b>	<b>Developer Guide</b>	<b>5</b>
2.1	Tooling Pre-requisites . . . . .	5
2.2	Development setup . . . . .	5
2.3	Running scripts . . . . .	5
<b>3</b>	<b>Version</b>	<b>7</b>

The *ska-gui-local-storage* repository contains the code for the SKA GUI Local Storage component.

## OVERVIEW

The *ska-gui-local-storage* repository contains the code for the SKA GUI Local Storage component that is used to store data used by front end applications in a Redux store.

### 1.1 Usage

...

## DEVELOPER GUIDE

This document complements the guidelines set out in the [SKA telescope developer portal](#)

### 2.1 Tooling Pre-requisites

This project requires **Node** and **YARN** to install and run. To install please follow the instructions for your operating system at [nodejs downloads](#).

Alternatively, the official Node docker image can be used. Instructions can be found on the [official Node docker image site](#).

### 2.2 Development setup

...

### 2.3 Running scripts

You should now be able to run the scripts defined in the package.json within the project directory.

...

*Overview*

This is a simple constant that provides the latest version of the library

---

*Code snippet* ./services/theme.tsx

```
import { GUI_LOCAL_STORAGE_VERSION } from '@ska-telescope/ska-gui-local-storage';
```

---

---

**Testing Identifier**

n/a
